

TECHNICAL SPECIFICATION

# European Oak

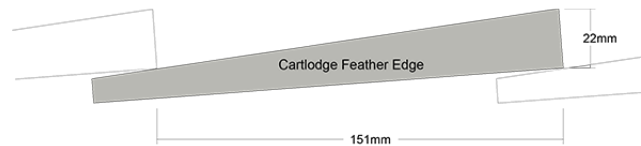

Supplied kiln dried or wet depending on your requirements, Euro Oak is a durable cladding material well suited for traditional applications. With its attractive character it works very well as a traditional barn Featheredge. If you require something more modern than the Featheredge then Euro Oak's versatility means we can supply it in Air Dried or Kiln Dried boards to suit your requirements.

Quercus robur  
Density: 720Kg/M3 (Kiln Dried)
